

## INTEGRATED MANAGEMENT POLICY Ed.01

ALGAENERGY'S management, convinced of the importance it has for the company to meet the needs and expectations of its customers, provides all the necessary resources to ensure that its activities in Development, Production and Commercialization of its microalgae derived products, obtain a high quality standard degree by implementing an Integrated Quality Management and Environmental Management System, based on the requirements of the **UNE-EN ISO 9001: 2015** and **UNE-EN ISO 14001: 2015**.

### MISSION

- Promote continuous yield improvement of the microalgae cultivation processes.
- Increase knowledge and the benefits of using products of the highest quality derived from microalgae.
- Market these innovative products at competitive prices.
- Maintain AlgaEnergy's positioning as an international leader in R&D in this emerging socioeconomic sector, and on the other hand, become the best testimony of the enormous talent that Spain consolidates in this field of science and knowledge.
- Have a production based on a total commitment with the **environmental protection and continuous improvement of the environmental performance** (including waste reduction, minimizing consumption, control over emissions into the atmosphere, etc.)

### VISION

- Develop products of interest for different socioeconomic sectors, including in the soon future third-generation biofuels derived from microalgae, which can contribute to progress and social welfare.
- Develop products derived from microalgae that help to increase the welfare and progress in different regions of the world, protecting the environment, nature and life on our planet.
- Promote continuously an internal and external culture for **pollution prevention**.

### VALUES

-  We are firmly committed to generate progress, making our life in this planet more sustainable.
-  Serve our customers, continuously challenging ourselves in order to achieve the highest levels of satisfaction through meeting customer's requirements and a continuous improvement of the quality in our products and services.
-  Continuous improvement towards the excellence as a way of working, considering the risks and opportunities that may affect the conformity of products and services, and the ability to increase customer satisfaction.
-  Awareness of our organization and its staff with regards to the importance of an effective quality management and compliance with the QMS requirements, as well as to enable continuous improvement.
-  Commitment to a strong ethic of work, integrity and honesty, as well as **compliance with applicable laws and regulations**, as well as other principles the organization subscribes which are applicable to the scope of the environmental aspects identified by ALGAENERGY.

All necessary mechanisms have been established in order that the whole organization knows, understands and puts into practice the policy above described.

Madrid, the 6th of July 2016

D. Carlos Rodríguez-Villa Förster

Director - General Manager

AlgaEnergy S.A.
